Cleaner Types

1

Mild non detergent soap (Joy, Dove, Ivory) and water. Use clean cloth or sponge to dab the stain with soapy water. Remove the soap solution with water dampened cloth. Dry with soft lint-free cloth.

2

Mild petroleum solvent (naptha, lighter fluid) or mineral sprits (paint thinner). Lightly wipe stain with clean cloth moistened with solvent. Blot the area and air dry.

3

One part Wisk detergent and one part rubbing alcohol. Dab lightly with cloth moistened with the solution. Do not rub. As the ink loosens, blot the area with dry cloth. Repeat as necessary. Rinse with a water dampened clean cloth.

NOTE: Exercise proper care when using solvents or solvent cleaners. Some solvents are flammable. Read and follow manufacturer's written directions. Use with adequate ventilation. Wear protective gloves.
