

RED LIST FREE

Martin Brattrud prioritizes using low impact materials and finishes across all of our products. We are consistently looking to use the best-in-class, healthiest materials for our employees, clients and users. With this in mind, all of our standard products use materials that meet the Living Building Challenge's **Red List Free** criteria.

Customers are responsible for specifying fabrics compliant with the guidelines.

This letter serves as a declaration that to the best of our knowledge, based on the information provided to us by our suppliers, our furniture does NOT contain the harmful chemicals identified on the 2022 Living Building Challenge Red List.
